AP HUMAN GEOGRAPHY: FINAL INSTRUCTIONS AND PROJECT EXAM

PART 1

INTRODUCTION and STANDARDS

Applying all the skills acquired throughout the course, students will select a random developing country and create a video analysis and profile of the country. Students will create an infographic that will accurately capture the data they collect and provide a QR code on that graphic that will lead to a video that you created and edited with further information about the country and culture.

Students should consider the following content areas while researching and creating their project:

- Physical Geography
 - Explain major geographical concepts underlying the geographic perspective
 - Use landscape analysis to examine the human organization of space
 - Use spatial thinking to analyze the human organization of space
 - · Use concepts such as space, place, and region to examine geographic issues
- Population and Migration
 - Use population density to explain the relationship between people and the environment
 - Explain the implications of population distributions and densities
 - Analyze population composition
 - Interpret and apply theories of population growth and decline
 - Evaluate various national and international population policies
 - Explain the causes and implications of an aging population
- Cultural Patterns and Processes
 - Explain the concept of culture and identify cultural traits
 - Explain how globalization is influencing cultural interactions Compare and contrast ethnic
 - and universalizing religions and their geographic patterns Compare and contrast popular and folk culture and the geographic patterns associated with each and change
- Political Organization of Space
 - Explain the structure of the contemporary political map
 - Evaluate the geopolitical forces that influence the contemporary political map
 - Explain the concepts of political power and territoriality
 - Analyze the spatial relationships between political systems and patterns of culture and economy
 - Apply the concepts of centrifugal and centripetal forces at the national scale
- Agriculture, Food Production, and Rural Land Use
 - Explain the connection between physical geography and agricultural practices
 - · Analyze the economic forces that influence agricultural practices
 - Explain the interdependence among regions of food production and consumption
 - Identify rural settlement patterns
 - Compare and contrast the land use zones of von Thünen's model
- Industrialization and Economic Development
 - Use Weber's model to explain industrial location
 - Explain social and economic measures of development

- Analyze the causes and consequences of international trade and growing interdependence in the world economy
- Cities and Urban Land Use
 - Apply models to explain the hierarchy and interaction patterns of urban settlements.
 - Analyze residential land use in terms of low-, medium-, and high-density housing.

EXAMPLES

See the following documents for an exceptional infographic.

For a great video example, see the following video: <u>https://www.youtube.com/watch?v=j3XpfBChLyk</u>

RUBRIC

See the attached rubric for specifics on how your grade will be determined.

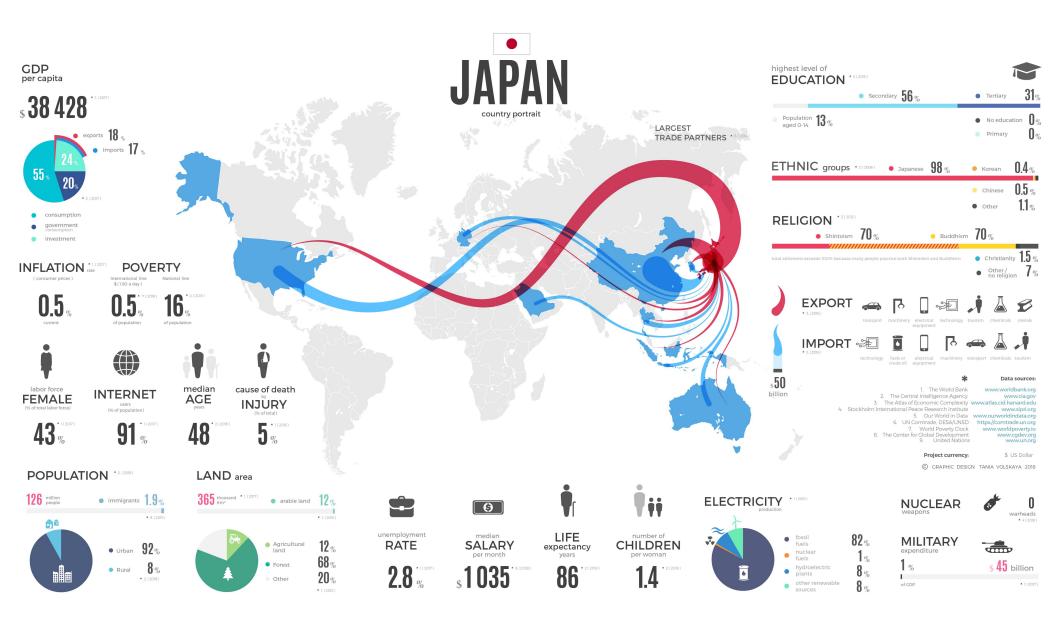

IMPORTANT FINAL SUBMISSION INFORMATION

The final project must be submitted to Canvas by the end of your final session during period 1. If you leave some time to work on it during that time, that is permitted. If you would like to submit the final early, that is also permitted.

PART 2

All students will complete an evaluation form the day of the exam. This evaluation form is not graded but will help me teach the course more effectively the following year. The form link will be given to you (or emailed to you for seniors) at the start of your final.

It has been a pleasure exploring Human Geography with you all this year and I hope that your eyes have been opened a little more widely to the world around you.
